

YANG BEY

A Great Variety of High Quality Packing Tools
Tape Dispensers & Small Hardwares

Company Introduction

Founded in 1979, Yang Bey has become a leading manufacturer of strapping tools and packing tools in Taiwan. Our products have been sold to over 85 countries. Our customers are importers and/or distributors from packaging, material handling, or logistic industry. Some customers themselves are manufacturers for strapping, tapes, stretch film, etc. We far realized that helping our customers to reduce their cost and time is a way to create our value. We, therefore, challenge ourselves to be a one-stop-shop supplier. Our customers can reduce communication time, minimum order quantity, transportation costs and inventory expense if we are able to supply them as many tools as possible from one source and in timely manner. Our **lead time is 25 days** for standard products. They can focus on sales and expansion of business. With this target in mind and 40-year-experience, we have developed a complete cross section product line that includes strapping tools, seals/buckles, banding tools, clamping tools, film dispensers, tape dispensers, label dispensers, bag sealers, paper cutters, utility knives, bubble wrap dispensers, etc.

It is the initials of **Yang Bey Industrial CO., Ltd.** We understand the difficulty of establishing and maintaining a sound brand image and therefore, all our products are **made in Taiwan** by trained labors and professional managements to ensure quality consistency. Also **USD 1 million product liability insurance** is applied to all our productions as a service and support to our tool users. We want our customers to feel not only good but also safe to use them. If you are interested in any tool in this brochure, don't hesitate to contact our sales team. We are here to serve you.

Composite

◀ P 106

Rack tensioner with plastic cutter handle for 1/2" ~ 3/4" PP and PV strapping.

VIDEO

▶ P 108

Rack tensioner with metal cutter handle for 1/2" ~ 3/4" PP and PV strapping.

Tighten the strap and insert the seal

Crimp the seal

◀ P 116

Tensioner with oilless bearings in handle and base. Gripper wheel gives greater tension. For 3/8" ~ 3/4" PP & PET strapping.

▶ P 117

Tensioner with oilless bearings in handle and base. For 3/8" ~ 3/4" PP, PET & composite strapping.

◀ **P 242**

Tensioner with oilless bearings in handle and bearings in base.
For PP & PET straps up to 3/4" wide.

▶ **P 260**

Heavy duty tensioner with oilless bearings in handle and base.
For 3/8" ~ 3/4" PP & PET strapping.
It is an up-graded tool with stronger base and modified gripper that will not get stuck during operations.

◀ **P 270**

Heavy duty tensioner with oilless bearings in handle and base.
For 3/8" ~ 3/4" PP & PET strapping.

▶ **P 276**

Heavy duty tensioner with oilless bearings in handle and base.
For PP & PET strapping up to 1".

P117 Regular Duty

P270 Heavy Duty

► **P 330**

Tensioner with oilless bearings in handle and base.
For 1/2" ~ 3/4" PP, PET & composite strapping.

Tighten the strap

Crimp the seal

Tension PET strap

► **P 395**

Heavy duty aluminum tensioner with oilless bearings in handle and base.
For 1/2" ~ 3/4" PP, PET & composite strapping.

◀ **PQ 200**

Light weight tensioner with oilless bearing in handle and base.
For 1/2" ~ 3/4" PP & PET strapping.

PP

Smooth PET

Embossed PET

Composite

► **PQ 300**

Heavy duty premium tensioner with one way bearings in handle and base.

For 3/8" ~ 3/4" PP & PET strapping.

Feels lighter and reduces fatigue. One way bearings enable the handle to tension smoothly without annoying voice.

◀ **YP 370**

Industrial quality medium duty tensioner for 1/2" ~ 3/4" PP, PET & composite strapping.

Aluminum base with copper bushings in handle and base.

► **P 460**

Large heavy duty aluminum tensioner with oilless bearings in handle and base.

For 1/2" ~ 1-1/4" PP, PET & composite strapping.

► P 173

Hand pull tensioner with cutter for PP strapping. Use with CPB 4/ CPB 42/ CPB 5 buckle.

Tension the strap

CPB 4 / CPB 5 / CPB 42

Cut the excess strap

► **PE 1044**
PE 1045

Heavy duty combination tool for PET strapping.

Tensioning, sealing and cutting all in one.

****Good quality serrated seal is important to achieve the desired sealing performance.**

PE 1044: 1/2". Use with CP 34 gripper seal.

200 pcs of CP34 included free of charge.

PE 1045: 5/8". Use with CP 35 gripper seal.

200 pcs of CP35 included free of charge.

Insert seal

Tension the strap

Close the seal

Cut the strap and move away

► **P 1604**
P 1614
P 1605
P 1615

Combination tool (tensioning, sealing and cutting all in one) for PP strapping.

P 1604 for 1/2" PP strapping thickness from 0.5mm up. Use with CP 04 seals.

P 1614 for 1/2" PP strapping thickness up to 0.5mm. Use with CP 04 seals.

P 1605 for 5/8" PP strapping thickness from 0.5mm up. Use with CP 05 seals.

P 1615 for 5/8" PP strapping thickness up to 0.5mm. Use with CP 05 seals.

CP 04 / CP 05

◄ **P 1624**
P 1625

Combination tool (tensioning, sealing and cutting all in one) for PP strapping.

P 1624 for 1/2" PP strapping thickness from 0.5mm up. Use with CP 04 seals.

P 1625 for 5/8" PP strapping thickness from 0.5mm up. Use with CP 05 seals.

VIDEO

◄ **P 18000-P1**

One piece of P 180 gripper tensioner with 20 pcs of CWB 4 buckles in blister card pack.

CWB 4 / CWB 5

► **P 180**

Twin gripper tensioner with built-in cutter for 1/2"~5/8" PP strapping. Use with CWB 4/ CWB 5/ CWB 4-Z / CWB 5-Z wire buckles.

Woven

Hot melt

► **P 119**

Tensioner with oilless bearings in handle and base.
For 3/8" ~ 3/4" hot melt & woven strapping.

► **P 243**

Tensioner with oilless bearings in handle and bearings in base.
For 3/8" ~ 3/4" hot melt & woven strapping.

► **P 310**

Tensioner with oilless bearings in handle and base.
For 3/8" ~ 3/4" hot melt & woven strapping.

VIDEO

► **P 391**

Heavy duty aluminum tensioner with oilless bearings in handle and base.
For 3/8" ~ 3/4" hot melt & woven strapping.

◀ PQ 220

Light weight tensioner with oilless bearing in handle and base.
For 1/2"~3/4" hot melt & woven strapping.

▶ P 277

Heavy duty tensioner with oilless bearings in handle and base.
For hot melt & woven strapping up to 1".

◀ P 278

Heavy duty tensioner with nose function for PET, hot melt & woven strapping up to 1".. Ideal for round and irregular packages.
Use with CWB 4/ CWB 5/ CWB6.

VIDEO

CWB 4 / CWB 5 / CWB 6

▶ YP 380

Industrial quality heavy duty tensioner for 1/2"~3/4" PP, PET & composite strapping.
Zinc base with copper bushings in handle and base.

Woven

◀ P 471

Giant heavy duty aluminum tensioner with oilless bearing in handle and base.

For 3/4" ~ 1-1/2" woven strapping.

▼ P 472

P 482

Giant heavy duty aluminum tensioner with oilless bearings in handle and base. For PET, composite and woven strapping.

P 472: For 3/4" ~ 1-1/2".

P 482: For 1" ~ 2".

VIDEO

Smooth PET

Embossed PET

Composite

Woven

◀ P 474

P 474: Tensioner with nose holes pre-drilled.
For 3/4" ~ 1-1/2" PET, composite and woven strapping.

◀ P 4750-NS

Nose Kit. Can be ordered as accessory
to install on P 474.

▶ P 475

P 475 : Giant heavy duty aluminum tensioner with nose
function for round and irregular packages.
For 3/4" ~ 1-1/2" PET, composite and woven strapping.

◀ **P 476**
P 486

For PET, composite, woven cord strap and medium duty lashing strap.
Base is a combination of aluminum and steel. Comparable to tool made of steel in the market but a lot lighter in weight.

P 476: For 3/4"~ 1-1/2"

P 486: For 1~2".

▶ **P 190**

T-bar tensioner for cord strap up to 2" wide and thickness up to 1/8"(3mm).

VIDEO

▼ P 580

Robust tool with a base that combines the light weight of aluminum and the strength of steel. It weighs only 3.2 kgs so it is easy to use but also strong enough to handle heavy duty tasks. **For heavy duty woven strap, composite strap or lashing from 1-1/2" ~2"**. Handle pawl design allows the user to move the handle to a position that is easy to apply more tension to the strap.

VIDEO

1. Handle release pawl allows reposition of handle during operation.
2. Ergonomic handle.
3. Leg designed to lift with vertical motion.
4. Windlass rotates clockwise and anti-clockwise.
5. Bigger clearance between windlass and other parts. This allows longer strap to be coiled on the windlass.
6. Pawl release pin.
7. Thicker and durable ratchet wheel.
8. Base is a mix of steel and aluminum.
9. Specially designed teeth to give greater holding power.
10. For cord or lashing strap up to 50mm.

◀ **P 582**

No cutter device. Only 2.9 kgs.

▶ **P 585**

With nose design. Work great with round or irregular object. Tool weighs 3.5 kgs.

▼ **P 587**

With nose design but no cutter device. Tool weighs 3.1 kgs.

P 580

P 486

▼ **PH 320**
PH 350

Heavy duty windlass tensioner. Windlass can be adjusted so the slot is in line with angle of strap. One piece of CN 180 lashing strap cutter included.
PH 320: For woven strap up to 1-1/4" wide.
PH 350: For woven strap up to 2" wide.

VIDEO

▼ **CN 180**

Lashing strap cutter that cuts thick and strong strap in any angles easily. Also with a splitter that cut tapes. Rotary blade is sharp and with long life time.

VIDEO

▼ PA 472

Pneumatic tensioner with manual cutter for composite strapping, woven strapping and lashing up to 1-1/2" (40mm) x 2mm thick. The windlass can spin forward to tension the strap and after cutting the strap, it can spin backward to release the strap.

Max. Tension : 7500N

Max. Air Pressure: 7 bar

**► PA 473**

No cutter device and nose design. Lighter weight. Good for flat or square package.

◀ **PA 475**

Nose device is included as an accessory. When nose device is installed, it can be used for round or irregular package. In the other hand, can use on flat or square package when nose not installed.

▶ **PA 476**

No gripper device but with nose. Good for round or irregular package.

◀ **PA 477**

No cutter device and gripper device. Very light weight. Good for round or irregular package.

◀ H 100

Carbon steel drop forged cutter for 3/8" ~ 3/4" x 0.035" steel strap. Spring design to reduce operation fatigue.

VIDEO

▶ H 101

Same as H100 and with magic tie for safety storage.

VIDEO

Blades are sharp so it is even easy to cut soft material such as PP strap.

◀ H 200

Same as H201 but without yellow PVC grips.

◀ **H 201**

Best selling carbon steel drop forged cutter with wide blades and yellow PVC grips.
For steel strapping 3/8" ~ 1-1/4" x 0.035"

VIDEO

Our blades are made so precisely and sharp so the cutter can cut soft material such as PP strap. Never worry about the strap been stuck or jammed between blades.

Before and after CNC processing

▶ **H 230**

Heavy duty steel strap cutter with wide blades for 3/8" ~ 1-1/4" x 0.035". "SAE 4140" high carbon steel drop forged.

VIDEO

◀ **H 240**

Regular duty cutter for 3/8" ~ 1-1/4" x 0.035" steel, PP and PET strap. Sheet metal handles is lighter but durable. Weighs only 0.6 kgs.

► **H 263**

Cutter with rubber pads gently releases the straps after cutting.
For steel strapping 3/8" ~ 1-1/4" x 0.035".

VIDEO

Rubber pads hold the strap firmly when cutting the strap and they also can avoid sudden release of strap after cutting.

◀ **H 268**

Cutter with safety function which holds excess end strap when cut the strap.
For 3/8" ~ 1-1/4" x 0.035" straps.

► **H 300**

High carbon steel drop forged strap cutter for straps up to 2" x 0.035".

► **H 302**

High carbon steel drop forged cutter with hammer knob for strap up to 2" x 0.035".

Hammer knob handle

Anti-flapping plate blocks strap during and after cutting.

Lock Nuts to avoid loosening. Increase life time.

Sharp and narrow blade makes it easy to insert the blade under the tightened strap.

▼ **H 305**

SAE 4140 high carbon steel drop forged heavy duty steel strap cutter for straps up to 2" x 0.05".

Whole tool is bake painted after assembled. The paint can protect against rust.

VIDEO

◀ H 306

Heavy duty steel strap cutter for straps up to 2" x 0.050".

▶ H 307

Same as H306 but with hammer handle which allows the user to push the blade easily in between the strap and package. No more twist that damage the blade, strap and/or the package.

STRIKE HAMMER HANDLE

Hammer the blade to squeeze it in between the strap and package.

No more twist that damage the blade, strap and/or the package.

▶ H 410

High carbon steel drop forged strap cutter for straps up to 2" x 0.05". Blade can be reverse when dull.

STEEL STRAP COIL WINDING

Ribbon Wound: The steel strapping is wound onto itself so that the width of the coil is the same as the strap.

Oscillated/Mill Wound: The steel strapping is wound across a width of the coil. The width of the strap is smaller than the coil.

HOW TO PICK THE RIGHT DISPENSER?

1. Obtain the core size, face coil and outer diameter (O.D) of the strap coil you are using. (And ribbon wound or oscillated/mill wound if you wanted to use for steel strap)
2. Check our table and eliminate those don't fit your strap spec.
3. Find your preferable handle type (single bar or trolley type), disc type (metal, plastic, or no disc), break design (regular, trolley or economy brake), wheel size and type.
4. Done! You've got the right dispenser!

Find the Right Dispenser

◀ **STRAP ROLL**

▲ **OSCILLATED MILL COIL**

The steel strapping is wound across a width of the coil. The width of the strap is smaller than the coil.

▲ **RIBBON WOUND**

The steel strapping is wound onto itself so that the width of the coil is the same as the strap.

► CA 872 Tool Balancer Dispenser

(Tool balancer not included)

- Hang and hold the tool to minimize operator effort during the use of the tool.
- Designed to withstand tool weight max. 15 kgs.
- Good for plastic and steel strapping coil that has 200 mm (8") or 400mm (16") inner core.
- Load strap coil while keeping the dispenser in upright position.
- Big tool tray 450 x 220 x 130mm.
- One storage pin behind the tool tray to hold warehouse accessories such as pens, rulers, knives, stretch wrap roll, etc.
- Lacing rod holder included.
- Casters with brake.
- One hanging bar above tool tray to keep label or tape rolls.
- Dispenser Size: Max. 120 x 55 x 220cm. 42 kgs.

1. TOOL TRAY

Big enough to store battery or pneumatic tool.

2. CASTER

Casters with brake

3. STORAGE BIN

Put pen / pencil / knife, etc

5. LANCING ROD HOLDER

Keep the pallet probe.
Pallet probe sold separately.

4. WHEEL

Heavy duty 10" wheels

Horizontal paper cutter with serrated blade to cut paper and film. Can be mounted on the wall. For roll diameter up to 9".

PD 100: 24" working width.

PD 104: 36" working width.

PD 107: 48" working width.

◀ **PD 300**
PD 304
PD 307

Vertical paper cutter that accommodates one paper roll up to 9" in diameter.

PD 300: 27" working width.

PD 304: 36" working width

PD 307: 48" working width.

► **PD 308**

Vertical paper cutter with large base for stability. 63" working width.

Blade is equipped all the way from top to the bottom of paper roll so the paper can be cut completely.

The paper blade is designed that it can be pull backward and lock in open position. Loading new paper roll only require one person.

Paper cutter with slip resistant rubber feet.
 Accommodates roll diameter up to 24cm.
 A thoughtful door latch design to block the movement of clamping arm and keeps the blade away while loading the paper roll.
 This design also allows the replacement of new paper roll by only one person.
 Loading paper roll is now safer, easier and quicker.

NO LOGO

Double (twin) color rubber handle. Reduce operation fatigue.

Color code:
AH: Black handle with red rubber.
AS: Gray handle with red rubber.
BS: Gray handle with blue rubber.

Our Safety Retractable Blade

There are several features to define a good and quality tape dispenser. The ergonomic rubber handle provides operators long time use without fatigue. The rubber roller offers firm and consistent pressure to the tape to apply to the carton. The tape tension adjustment nut allows user to set their preferable tension based on the spec of tape. And one thing very important is the blade. All our blades are made of good quality steel with case harden process. The blade teeth are designed sharp and deep so they cut most of the tapes in the market easy. Some users have requirements for safety blade. With this in mind, we came up a patented safety retractable blade design. Our customer can enjoy a blade that lasts long, easy to replace, and safe.

Blade is hidden inside dispenser.

Only expose when wiper is pushed back.

TAPE IN USE

Blade is away from the tape and box when applying tape.

Blade reveal when wiper touch the side of box.

EASY REPLACEMENT OF WIPER

Push the wiper forward to disconnect.

Take the wiper out. Insert a new wiper.

Pull up and click the wiper in place to the dispenser.
